To whom this may concern,

I was first introduced to Joseph Arzate at FileMaker training in August '10. There, he assisted the instructor by answering questions, providing many step by step break downs of a process, terms and overview of FileMaker in addition to his professional experience. The instructor highly recommended him for any consulting needs and also stated he was a good additional person to talk to if I had any further questions. Since the training, I contacted him for a database project that he was approved for and has been working with us (Early Childhood Education of Baldwin Park California) for about 3 months; it has been a pleasure the entire time. In this short time and with just the ideas for a database, he has been able to produce a draft that looks appealing yet functional. He has accomplished all this while providing great communication, flexibility and patience with all persons that are involved in this project. Though he is very knowledgeable in FileMaker, he has been able to discuss the process and it's complexity in a very easy and understanding way. I thoroughly appreciate what he has done and continue to do with our program and look forward to continue working with him. He is a highly recommended consultant and worth considering for any projects you may have.

Sincerely,

Daniel Evers-Everette

Computer Service Technician

Early Childhood Education of Baldwin Park /Tri-Cities
