

Civic Asset Management Group (AMG) – “Asylum”

by Joseph Arzate - 11/6/2020

Overview

The purpose of this document is to provide a very high level overview of the “Asylum” software the Civic Asset Management group currently utilizes to manage and track all Civic funded loans. This document will provide a description of how the custom built software “Asylum” is utilized to manage key Civic loan data. By no means will this document cover all aspects and features of the program and it’s dependencies.

Claris FileMaker Pro

“Asylum” is the codename to a custom database solution written in a database by Claris called FileMaker Pro. FileMaker Pro is a cross platform Rapid Application Development (RAD) tool utilized by developers to create custom applications to fit a business requirements.

Claris is a subsidiary of Apple and it’s been a profitable company for over 20+ years. FileMaker Pro has over 1 million users worldwide and over 50,000 businesses rely on it everyday. FileMaker Pro supports and integrates with Enterprise SQL Databases. It can exchange data using PHP, JSON, JavaScript, HTML, RESTful API. It’s single base code system can easily deploy to both Mac and Window client computers, across the web, and to iPad devices.

“Asylum”

Asylum is an ever evolving program that over the years has been custom tailored to handle different aspects of a NPL and Civic loans. Recently it’s been updated to track only Civic loans and manage new Civic programs such as Multi-family, and Correspondent loans.

Here are key data points “Asylum” will store / manage

- I. Civic Loan Funding
 - a. Upon the funding of a new Civic loan in Encompass. Asylum will interact with a web-service via JSON, and retrieve newly funded loan data via a weekly scheduled script from Encompass and import them into Asylum.
- II. Servicer Data – Daily Import
 - a. Asylum imports and updates daily Servicer data.
 - b. Asylum will push to Encompass the assigned Servicer Account number.
- III. Loan and Servicer data points currently housed in Asylum:
 - i. Loan level payment history
 - ii. Notes / Comments
 - iii. Key data points:
 - 1. Borrower Information
 - 2. Property Details
 - 3. Civic loan data at funding
 - 4. Civic loan program details (Multi-family, Correspondent, Rehab Draw)
 - 5. Property Valuations
 - 6. Title / Ownership
 - 7. Last Payment
 - 8. Next Payment Due
 - 9. Payment History
 - 10. FCL dates
 - 11. Property Taxes
 - 12. Bankruptcy
 - 13. REO data
 - 14. Notes/Comments gathered by the Servicer

- 15. Interest rate and default rate
 - 16. Lien Data
 - 17. Foreclosure
 - 18. Maturity Extensions
- IV. Data Share / Exchange
 - a. Asylum exports to the data warehouse information gathered and collected by the Asset Management Group.
 - b. Reporting tools and programs such as Velocify, Tableau, and SQL Data Warehousing rely on Asylum data for various reporting and data integrity checks.
