

December 6, 2017

To Whom It May Concern:

Joseph has worked for HMC Assets as the Senior Database Developer from January 2017 to the Present. His responsibilities include requirements gathering, analysis and the design of our Filemaker database.

Over the past year, Joseph has been a dependable employee who consistently exceeded his job requirements. He works hard to not only program the requested feature but to understand the underlying process and provide a solution that increases efficiency. Our projects often include multiple decision makers and I am always impressed with Joseph's ability to deal with different personality types. His strong technical skills are matched with interpersonal and problem solving abilities. Joseph not only meets deadlines but also explains his programs in a way that non-experts can easily understand.

Joseph is a talented programmer who enjoys a challenge. He often is tasked in figuring out the puzzles our previous employees created in their scripts. He also makes sure to keep up to date with new developments in programming by traveling to conferences, searching online blogs, and networking with other Filemaker programmers.

Overall, I would highly recommend Joseph as a database developer. He is a hard working employee who does not require a lot of oversight. He is also not afraid to admit when something is outside his wheelhouse.

Sincerely,

Steve Huff
